## DETAILED ACTION

### *Drawings*

1. Figures 1-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Specification*

2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by **Kainuma et al.** (U.S. 4,427,906).

5. With respect to claim 1, **Kainuma et al.** teach a piston supporting structure for a linear compressor comprising, a piston 9 reciprocating in the axial direction in receipt of a driving force of a motor 2, 3, 5 a first spring 7 of which one end is fixed to one side of the piston 9 and a

Art Unit: 3746

second spring 6 of which one end is fixed to the other side of the piston 9. See particularly **Figure 6** (attached to office action).

6. With respect to claim 2, **Kainuma et al.** teach spring fixing supporting members X, Y, Z, W each are connected to both sides of the piston 9 and end portions of the first spring 7 and second spring 6 each are fixed to the spring fixing supporting members X, Y, Z, W. See particularly **Figure 6** (attachment A to office action).

7. With respect to claim 3, **Kainuma et al.** teach that the other end portions of the first and second springs 7, 6 are loosely supported by the spring fixing supporting members X, Y, Z, W connected at a predetermined distance from both sides of the piston 9. See particularly **Figure 6** (attachment A to office action).

8. With respect to claim 4, **Kainuma et al.** teach that one of the spring fixing supporting members X is connected to the inner side of a compressor cover C. See particularly **Figure 6** (attachment A to office action).

9. With respect to claim 5, **Kainuma et al.** teach that one of the spring fixing supporting members W is connected to the outer side of an inner lamination IL. See particularly **Figure 6** (attachment A to office action).

10. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by **Park et al. (U.S. 5,993,178)**.

11. With respect to claim 1, **Park et al.** teach a piston supporting structure for a linear compressor comprising, a piston 232 reciprocating in the axial direction in receipt of a driving force of a motor, a first spring 270 of which one end is fixed to one side of the piston 232 and a

Art Unit: 3746

second spring 270' of which one end is fixed to the other side of the piston 232. See particularly **Figure 6** (attachment B to office action).

12. With respect to claim 2, **Park et al.** teach spring fixing supporting members X, Y, Z, W each are connected to both sides of the piston 232 and end portions of the first spring 270 and second spring 270' each are fixed to the spring fixing supporting members X, Y, Z, W. See particularly **Figure 6** (attachment B to office action).

13. With respect to claim 3, **Park et al.** teach that the other end portions of the first and second springs 270, 270' are loosely supported by the spring fixing supporting members X, Y, Z, W connected at a predetermined distance from both sides of the piston 232. See particularly **Figure 6** (attachment B to office action).

14. With respect to claim 4, **Park et al.** teach that one of the spring fixing supporting members X is connected to the inner side of a compressor cover 152. See particularly **Figure 6** (attachment B to office action).
